

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

CORRESPONDENCE**Popular Bird Names.**

EDITOR OF 'THE AUK':

The central idea of such of your remarks on pages 503-505 of the current volume of your journal as are in opposition to the propositions submitted in my letter of May 21 appears to be contained in your statement that "We cannot enforce upon the public what the public will not have," for you admit that the said propositions are "all very well in theory." May I say that in your very opposition you are in agreement with me, for the intent of my letter, as carefully explained in the third and the last paragraphs thereof, was to suggest a way of finding out definitely what, in matters of popular bird nomenclature, the public will have, so that it might be given them in the next edition of the A. O. U. 'Check-List.' I did not propose that the A. O. U. Committee on Nomenclature adopt forthwith the propositions presented, but merely that they submit them to the bird-studying, bird-loving public for their verdict. Have you not, in your remarks, given the reasons why you personally would express approval or disapproval of the various propositions in such a referendum, instead of speaking of the question of the referendum itself?

Again I respectfully suggest that the A. O. U. Committee on Nomenclature obtain an expression of popular will concerning the points embodied in the propositions in my former letter, rather than proceed to arrange the popular nomenclature of the 'Check-List' in accordance with any assumption, no matter how well-founded they may consider it.

HARRISON F. LEWIS.

P. O. Box No. 6, Quebec, P. Q.,
August 6, 1920.

[We regret if we misunderstood or misrepresented Mr. Lewis's suggestion. It is quite in order and proper that any suggestions should be made to the Committee and they will, we are sure, receive careful consideration. It would seem more desirable, however, that they be sent direct to the Committee rather than be published in 'The Auk,' as the journal is already overcrowded.—EDITOR.]

Baker on the Birds of the Pleistocene.

EDITOR OF 'THE AUK':

The University of Illinois has very recently published a sumptuous monograph entitled 'The Life of the Pleistocene or Glacial Period' by Mr. Frank Collins Baker, Curator of the Museum of Natural History of the University of Illinois. It is a beautifully gotten-up volume of nearly 500 pages, and illustrated by no fewer than 57 plates.
